

# Carbon footprint calculator for companies in tourism industry

- An open source carbon footprint calculator developed for the Regional Council of Lapland's project "[Välkky: developing low carbon and economically sustainable tourism in Lapland](#)", funded by the ERDF, in collaboration with Carbon Neutral Tourism (CNT) project, executed by Positive Impact

## Main targets of the calculator:

- to make carbon footprint calculation easier, taking into account the unique nature of the tourism industry
- to help tourism companies recognize their main sources of emission
- to produce reliable, comparable information about companies' carbon footprint (GHG Protocol Standard, Scope 3)
- to guide and encourage companies to reduce their carbon footprint
- to offer data of the carbon footprint for customer communication purposes
- to produce data for the carbon footprint calculation of destinations
- current location: [app.co2roadmap.fi](http://app.co2roadmap.fi)
